

FSG 406 ALFALFA

- Exceptional forage yield potential
- Superior forage quality
- High multifoliate leaf expression
- Unmatched winterhardiness and persistence
- Perfect 30 out of 30 on the Wisconsin Disease Index

FSG 406 alfalfa is a remarkable new variety that raises the performance bar higher than ever before. With an unmatched winterhardiness rating and 4 fall dormancy, FSG 406 performs well over a wide range of environmental conditions and is adapted to all areas where 3 and 4 fall dormancy varieties are planted. FSG 406 also features a disease index rating of 30/30 and resistance to stem and root knot nematodes. Whether it's for exceptional forage yields, superior forage quality or very fast recovery after cutting, FSG 406 is the choice for commercial hay, beef and dairy producers.
